SOFTWARE DEVELOPER

Throughout my career as a software developer I've focused on writing clean and maintainable code. I always strive to grow my skillset and learn the best practices.

SKILLS

C#	SQL	CI / CD (Railway, Azure DevOps)
.NET Core / .NET Framework	Entity Framework	React / Redux
Blazor / MVC / Web API	JavaScript	HTML / CSS / Bootstrap

PROFESSIONAL EXPERIENCE

FIRST   **September 2022 - Present**
Software Developer
- Work in an agile environment participating in code reviews, sprint retrospectives and ticket grooming
- Use C# daily to work on .NET Framework and .NET Core applications
- Write MySQL queries and stored procedures
- Collaborate with developers, business analysts and stakeholders
- Developed a reporting feature in the payment engine to gather more information on users
- Took on a codebase knowledge transfer of an externally developed React / .NET Core codebase from an external development team

BugTracker   **December 2021 - August 2022**
Software Developer
- Developed end-to-end a web application for companies to track their software development projects
- Implements role-based authorization to allow administrators to create projects and assign project managers to them. These project managers can assign developers and track the status and priority of tickets. Ticket members can leave comments, upload file attachments, and receive email notifications
- Built with C#, .NET 6 MVC, Entity Framework Core, PostgreSQL, and JavaScript

BugTracker Blazor   **January 2024 - Present**
Software Developer
- Migrating BugTracker application from .NET 6 MVC to .NET 8 Blazor / WebAPI
- Encapsulated Razor pages into Razor components
- Converted MVC controllers into WebAPI controllers

EDUCATION

Buffalo State College   **2018 - 2020**
Computer Information Systems
